

Trackable and Joint ID Numbers

Trackables

Each Trackable has a unique ID number which is set when the Trackable is defined; this enables code to quickly and easily tell the difference between a Left foot and Right Hand. Because of this the same numbers must be used throughout and this document will keep a list of them for reference.

They are:

1. Left Foot
2. Right Foot
3. Left Lower Leg
4. Right Lower Leg
5. Left Upper Leg
6. Right Upper Leg

Joints

Additionally Joints also have a unique number and they are:

1. Left Ankle
2. Right Ankle
3. Left Knee
4. Right Knee
